### Q.5) Why is international cooperation important in the context of climate goals?

Ans) International cooperation is important in the context of climate goals because climate change is a transboundary issue that affects multiple countries and regions. Collective action is necessary to address the challenges posed by climate change, as its impacts do not respect national borders. The context emphasizes that "global cooperation is crucial for addressing the transboundary nature of climate change," highlighting the need for collaborative efforts to effectively tackle this global crisis.

## Ask a Question
